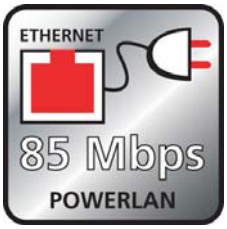
POWER LINE

POWERLAN 285 TURBO ETHERNET KIT



Convert your powerlines into a computer network!

- **85 Mbps HomePlug 1.0 compatible, range up to 200m**
- **Smallest housing on the market**
- **Intellon chipset**
- **No need for new cables**
- **Plug into any power socket and get started right away**
- **Maximised security, 56 bit DES encryption**

The Topcom POWERLAN 200 TURBO Ethernet Kit includes 2 powerlan Ethernet adapters and enables you to create an in-house wired computer network by using your existing electricity network. Get connected to the Internet in no time. A true plug-and-play solution.

The perfect solution to cover area's which can not be covered by Wireless LAN solutions due to the long distance or create a wired network where no Ethernet cable is available.
Connect your existing Cable or ADSL modem to your power lines and use your electricity network to get on the Internet.

Surf on the World Wide Web and share data with speeds up to 85 Mbps and a range of up to 200m.
